APPOINTMENTS	<b>Assistant Instructional Professor</b> , University of Chicago, Department of Economics (Beginning Fall 2025)	2025-
EDUCATION	<b>Ph.D. in Economics</b> , Stanford University Advisors: Matthew Gentzkow, Hunt Allcott, Doug Bernheim	2019-2025
	<b>B.A. in Mathematics and Economics</b> , University of Notre Dame	2015-2019
WORKING PAPERS	<b>Do Sports Bettors Need Consumer Protection? Evidence From A Field Experiment</b> (with Nick Grasley and Mariana Guido) <i>Abstract:</i> Corrective policy in sports betting markets is motivated by concerns that demand is driven by behavioral bias rather than a normative preference to gamble. We conduct a field experiment with frequent sports bettors to measure the impact of two biases, overoptimism about financial returns and self-control problems, on the demand for sports betting. We find widespread over-optimism about financial returns. The average participant predicts that they will break even, but in fact loses about 8 cents for every dollar wagered. Self-control problems are smaller and less common. We estimate a model of biased betting and use it to evaluate several corrective policies. Our estimates imply that the surplus-maximizing corrective excise tax on sports betting is twice as large as prevailing tax rates. We estimate substantial heterogeneity in bias across bettors, which implies that targeted interventions that directly eliminate bias could improve on a tax. However, implementation is challenging: we show that two bias-correction interventions favored by the gambling industry do not deliver the targeting improvements.  <b>The Role of Ideology in Media Coverage of Science</b> (with Harsh Gupta) <i>Abstract:</i> We study the role of political ideology in the diffusion of scientific knowledge by media outlets. We document, using a novel measure of scientist ideology that spans more than 600,000 papers, that outlets are statistically significantly more likely to cover scientists with similar ideology. However, the role of scientist ideology is small in magnitude when compared to the role of scientific quality, as measured by academic citations, journal quality, and research funding, in media coverage of science. On average, outlets are more likely to cover high-quality research written by misaligned scientists than low-quality research written by ideologically aligned scientists.	
SELECTED WORK IN PROGRESS	<b>Do People Undervalue Mental Health Treatment? Evidence From Gambling Addiction Therapy</b> (with Sarah Bogl, Nick Grasley, and Mariana Guido)  <b>Nonmarket Valuation and Imperfect Perception</b>	
TEACHING EXPERIENCE	<b>Stanford University</b> TA for Junior Honors Seminar TA for Undergraduate Behavioral Economics (x3) TA for Undergraduate Empirical Environmental Economics (x2) TA for Bing Honors College Undergraduate Thesis Boot Camp TA for Undergraduate Principles of Economics Outstanding Teaching Assistant Award (x4)	2025 2022-2024 2023 2023 2021 2022 - 2024

AWARDS & FELLOWSHIPS	Woods Institute Emerging Environmental Scholar Research Award, Stanford University	2025
	Responsible Gaming Grant, Colorado Division of Gaming	2024
	Ethics in Society Graduate Research Grant, Stanford University	2024
	Bill Lane Center for the American West Grant, Stanford University	2024
	George P. Shultz Dissertation Support Fund Fellowship, Stanford University	2023
	Roger Noll Dissertation Fellowship, Stanford University	2023
	Stanford Center for American Democracy (SCAD) Experiment Grant, Stanford University	2021
	Center on Philanthropy and Civil Society (PACS) Small Grant, Stanford University	2021
	Institute for Research in the Social Sciences (IRiSS) Research Data Grant, Stanford University	2021
	Bernoulli Senior Thesis Award (Honorable Mention), Notre Dame	2019
INVITED PRESENTATIONS	Open Source Macroeconomics Boot Camp (Student Fellow), University of Chicago	2018
	<b>2025:</b> Analysis Group, Edgeworth Economics, University of Wisconsin, University of Notre Dame, Bates White, National Conference on Gambling Addiction & Responsible Gambling	
	<b>2023:</b> University of Notre Dame
